Total	64.0	1.0	63.0	59.0	4.0	59.0	92.18

Benchmark

Numerical Reasoning

LOW

MEDIUM

High

Numerical reasoning tests measure a person's numerical reasoning ability, a specific aptitude which is a powerful measure of a person's overall cognitive ability. Ability to solve numerical problems using the four fundamental rules of arithmetic: addition, subtraction, multiplication, and division.

Candidate Feedback

The respondent's performance on numerical reasoning indicates that he has a very strong grasp of numerical concepts and a good ability to understand numerical information. He understands numerical tables and interpret this information in a logical, rational way, he has a strong ability to use this information to accurately draw inferences and conclusions from the data.

Problem Solving

LOW

MEDIUM

High

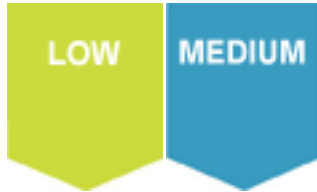

Problem Solving is the process of using a rational, systematic procedures and given statements to arrive at a conclusion.

Candidate Feedback

The respondent's performance on logical reasoning indicates that he has a very strong grasp over logic and a good ability to understand logical information. He understands and interprets information in a logical, rational way, He/she has a strong ability to use this information to accurately draw inferences and conclusions from the data.

Spatial Ability

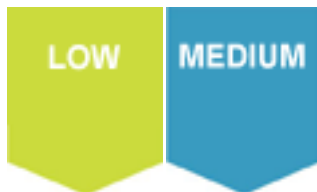

High

Spatial ability test measures the capacity to understand and remember the spatial relations among objects. It is the ability to understand and interpret diagrammatical concepts and interpret data in a logical and rational way.

Candidate Feedback

Your scores on the spatial ability test indicates that your ability to remember and recognize visual sequence is very good. You can very easily understand and analyze visual information and solve problems using visual reasoning. You are good at analyzing and solving complex problems without relying upon or being limited by language skills.

Verbal Reasoning

High

Verbal reasoning test measures the ability to understand and reason using concepts framed in words. It aims at evaluating ability to think constructively, rather than at simple fluency or vocabulary recognition.

Candidate Feedback

The respondent's performance on the verbal reasoning indicates that he has a good command of language and an ability to formulate logical, reasoned arguments. Having a 'well above average' level of verbal reasoning ability, he should be able to understand the logic of fairly subtle arguments and use words in quite a rational and well-reasoned way.
